

**Built-In Basin Faucet**  
**6875-J0-80CP**

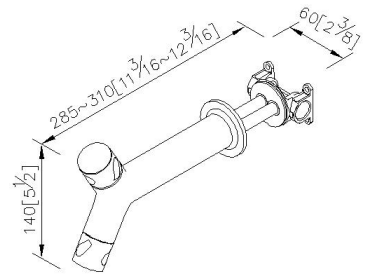

**INTRODUCTION:**

YES series is designed with brief lines and geometric cylinder to simplify the outer shape and present the absolute image. The YES 2 series is developed with more strict standards than the YES series to examine the consistency of products and design concepts. Concealed waterway module replaces traditional elbow high-pressure pipes and other structures, greatly reducing the appearance of seams and plastic gaskets, etc., to achieve a simpler and cleaner appearance.

**DESCRIPTION:**

- 1.Brass material of body meets JIS 3771 standard.
- 2.Ceramic valve past 500,000 life cycle test.
- 3.Lower handle is for water ON/OFF and flow rate control.
- 4.Upper handle is for water temperature adjustment control.
- 5.Chrome plated finish meets the standard of ASTM-SC2.
- 6.Material of concealed valve is Lead-Free Brass C46400.
- 7.Material for parts contacted with water is Lead-Free Brass C46400.
- 8.It requires the users to operate lower handle to control the flow rate once the water temperature is fixed by the upper handle.
- 9.Water outlet and switch set at the bottom of faucet so every drop of water on the hand and on the water outlet will fall into the basin without splashing onto faucet or countertop.

unit: mm[inch]

**Certification:**

**Fixing Kits:**

- 1.Hex Key 2.5mm\*1
