

INSTALLATION INSTRUCTIONS

Soap Dispenser 擠皂器檯面式安裝說明

1. Mark the proper position and drill a hole with 24~28mm (0.94"~1.1") diameter as the Fig. 1 shown.
請先選取預定安裝的位置,先確認鑽孔的位置,在檯面上鑽孔24~28 mm(0.94"~1.1")如圖示1
2. Pierce the **Bracket** through the hole and tighten **Plastic Hex Nut** to fix it; fill **PP Bottle** with liquid soap and thread into the **Plastic Hex Nut** until hand-tight; and last, insert the **Soap Dispenser Head** in the **Bracket**.
將底座置入孔內,鎖入六角螺帽. 將皂液裝入PP皂瓶內,鎖到六角螺帽內,再放入擠皂頭.
3. Users could purchase the optional **Plastic Hex Nut** and **Connector** to extend the shank of **Bracket** for installing on the thicker deck.
為防止檯面厚薄不一,可能發生擠皂器底座不夠長無法組裝,可以選配2多增加一個接頭和六角螺帽,便可增加長度.
