

Water Drinking Faucet 7770-G0-80S1

INTRODUCTION:

Still One shaped simply but equipped with perfect function. Inspired by the main design conception of "Less is More," Still One used brief lines and a simple model to integrate the practicality and elegance with the concise design style. It also fits for the general kitchen arrangement- small and saving space.

DESCRIPTION:

1. Using the #304, #303 stainless steel as the material makes the drinking faucet possess the character of acid-resisting, heat-resistant and erode-resisting. The surface is without the chemical painting to protect the users from harm.
2. The cartridge structure of the handle is different from the traditional brass cartridge, rubber cartridge and ceramic cartridge. It is designed with the stainless steel central structure and the lifespan of handle is up to 200,000 switches test.
3. The crucial parts are all made with the stainless steel which is durable and nontoxic to ensure the safety of drinking.
4. Water flow rate: over 4920 c.c./per minute (under 50PSI).
5. Fitting for all kind of R/O reverse osmosis water drinking faucets.
6. Coordinates with other products in Still One collection.
